Mid-level Software Engineer focused on back-end development, with solid experience in distributed systems and event-driven architecture. I work at Banco Safra building large-scale credit solutions, with a strong emphasis on performance, scalability, and operational efficiency.

EXPERIENCE

Software Engineer (Mid-Level) – Banco Safra SA

May 2025 - Present

- Led the design and development of a Private Payroll-Deductible Loan origination system, handling ~1 million loan requests at launch, using resilient and scalable architecture.
- Enhanced post-sale workflows for the payroll loan product, reducing operational friction and improving customer experience, through continuous refinement of business rules and integrations.
- Implemented an AI-powered agent specialized in the payroll loan product, improving demand planning accuracy for tech and business teams, integrated with internal chat tools.

Tech Stack: .NET / C#, Microservices, RabbitMQ, Redis, MongoDB, Integration services

Software Engineer (Junior) – Banco Safra SA

August 2023 - May 2025

- Redesigned the Portability and Refinancing flow, reducing loan disbursement time from ~7 days to same-day funding, by optimizing process flows and integrations.
- Refactored the loan origination pipeline, reducing stage transition time from minutes to seconds, by replacing batch processing with an event-driven architecture using RabbitMQ.

Tech Stack: .NET / C#, Distributed Systems, APIs, PL/SQL, RabbitMQ, Event-driven architecture, Microservices

System Analyst (Intern) – Banco Safra SA

January 2022 – August 2023

- Developed a real-time monitoring dashboard, increasing system observability and operational visibility, using Angular for tracking critical processes.
- Automated ticket triage and assignment, eliminating manual workload and improving operational efficiency, by developing a bot integrated with the governance platform.

Tech Stack: .NET, Automation scripts, Angular, TypeScript, REST APIs

EDUCATION

Computer Science – São Paulo Tech School

2021 – 2024

Relevant Coursework: Algorithms, Distributed Systems, Cloud (AWS, Azure), Java, Machine Learning, AI

High school with technical training in IT for the Internet.

2018 – 2020

Relevant Coursework: Java, MySQL, PHP

PROJECTS

ERP – CRM Integration Platform

2026

Bidirectional integration between ERP and RD Station, enabling automated synchronization of customer and sales data.

Tech Stack: SQL Server, .NET (Clean Architecture, Quartz, Webhooks, Polly, Refit)

Capstone Project

2024

Development of predictive models for the Brazilian stock market using Machine Learning and Deep Learning techniques.

Tech Stack: AWS, Python (LSTM, ARIMA, Random Forest)

LANGUAGES

Portuguese – Native | English – Professional Working Proficiency
